

from NLS

Chief, Communications Division, OSO

20 April 1951

CIA Records Officer

Disposition of Microfilmed Records

1. We have received a report from the National Bureau of Standards approving the processing of your microfilm from the standpoint of hypo content including reels numbered thru 55 A of one sequence and thru 57 B of the other. In the future, it is requested that at least eight inches of film be included in each sample submitted for hypo tests.

2. Upon verification of the film as to its legibility and useability, the paper copies may be destroyed in accordance with Congressional authorization reported by National Archives Job No. 351-S182. It will be appreciated if you will indicate the total quantity of paper records destroyed on this job number when you have completed the destruction.
